

### NTIA Compliant, Coupon Eligible, DTV Signal Converters

These compact, low cost converters enable analog TVs and “digital ready” TVs to receive off-air UHF and VHF digital television signals. Simply attach your antenna to the back of the converter and it will convert your local broadcast stations’ standard, enhanced, and high-definition digital signals into an analog TV signal format. This converter connects to your television using your choice of composite video (RCA jack) or 75 ohm RF cable.<sup>1</sup>

Model 1010

#### Standard Features

- Channel 3/4 selectable
- Infra red remote control
- V-chip parental control (version 2.0)
- AC3 Dolby Digital Stereo down mixing

### Attractive In-store Presentation

Packaged in bright, attractive 4-color cartons that describe all technical details related to the coupon program and the installation and operation of the converter.

The converters are shipped in a 4-color master carton with a plain, slip-over box cover. The master carton describes converter features, the coupon program and how to get a coupon.

<sup>1</sup> Access HD digital converters are specifically designed to support analog TVs after the February 2009 conversion from analog broadcasting to digital broadcasting.  
<sup>2</sup> Certain consumer and retail store terms, conditions, and restrictions may apply to be eligible for the NTIA coupon program.  
<sup>3</sup> Pricing based upon a minimum order quantity of 5,000 pieces, delivered to a distribution center in continental USA, net 30 day payment terms with approved credit.  
<sup>4</sup> The model 1020 is not Energy Star compliant due to the external power supply, also does not offer an RJ-11 and RS232 interfaces due to size constraints.
