

# STANLEY®

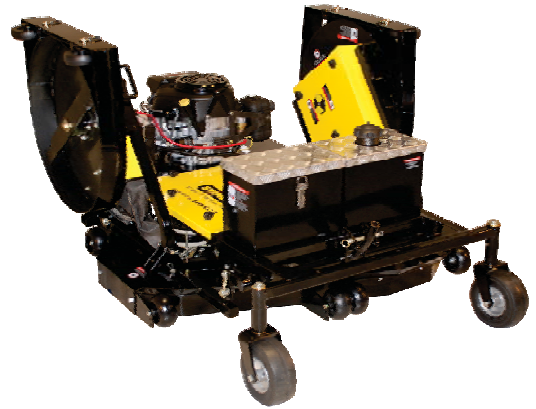

## 100" Tow Behind Mower

This commercial STANLEY 100 inch tow behind is designed to reduce cutting time while providing convenience and transportability. The innovative tow behind is designed so the 26 inch wings fold up and operate as either a 52 inch brush cut or a 52 inch finish cut mower. The mower wings will automatically engage and disengage with no tools required. This commercial mower will fit on a utility trailer, in a small garage, or through a 52 inch gate opening. With the wings down, the mower expands to 100 inches to cut big fields.

This is an extremely flexible, commercial duty STANLEY tow behind mower powered by a 20 HP Kawasaki engine. Features high blade tip speed providing a commercial quality finish cut appearance. Easily converts to a brush cut configuration for clearing overgrown vegetation. Tow behind your existing mower using the offsetting hitch for additional time savings. No other mower offers this range of features, size, flexibility and value.

- Reduce cutting time
- 100 in. cut capacity
  - i) 52 in. main deck
  - ii) Two 26 in. wings folds up
- Fit through 52 in. openings
